

## KingKong EZ-Ground Rod

### Product Description

The Ground Rod Driver GRD-200 is specifically designed for the electric utility sector to efficiently and safely drive ground rods into the soil at ground level. This robust and reliable tool enhances productivity and ensures the secure installation of grounding systems.

### Key Features

- **Durability:** Constructed with high-grade steel for long-lasting use.
- **Efficiency:** Delivers high impact force to drive ground rods quickly and effectively.
- **Safety:** operated at ground level and no slip jaws.
- **Ergonomics:** Designed to be used with a slide and ground technique
- **Versatility:** Suitable for various soil conditions and compatible with multiple ground rod sizes.

# BLUEMAX USA

## Technical Specifications

### Materials:

Outer case 4140 cro-moly billet case heat treated & class 4 electroless nickel plated  
serviceable D2 tool-steel jaws hardened to 50RC for extreme wear

Resistance hardened alloy steel TE-S bit

Dimensions: 12 inches (length) x 6 inches (diameter)

Weight: 10 lbs

Fitting: 7/8 or 11/8 hex bit

Impact Force: Max 100ft-lbs per strike

Drive Capacity Compatible with ground rods up to 3/4 inch in diameter

**Note:** Specifications are subject to change without notice. Please contact our sales department for the most up-to-date information.

## Ordering Information
